

26/06/2023

To whom it may concern,

Subject: Update to the notification of regulatory amendments to the REACH Candidate List of substances in tyres; applicability to products within the Bridgestone Europe NV/SA portfolio.

Under the REACH Regulation, the European Union maintains a list of Substances of Very High Concern (SVHCs) named Candidate List. The list of SVHCs is officially published at <https://www.echa.europa.eu/candidate-list-table>.

We are writing to update the notification sent to you last March that a substance, **6,6'-di-tert-butyl-2,2'-methylenedi-p-cresol (CAS# 119-47-1)**, present in concentration above 0.1 % w/w in certain tires (representing less than 5% of our total volume) manufactured and/or distributed by Bridgestone Europe NV/SA, has been added to this list.

According to REACH Regulation article 33 we are under an obligation to notify you of this and to provide you with any information you may need to ensure the safe use of those products. The updated list of PSR/CVR impacted products is included in Annex I.

This substance is currently in the process of being progressively eliminated from our portfolio; based on current roadmap for substitution, reduction of substance concentration below 0.1% w/w is foreseen by mid-2024.

Bridgestone Europe is systematically monitoring any update of the Candidate list, thus in case of any change on the contents of such statement we will inform you.

Should you have any question regarding the content of this letter, or any other REACH related subject, please do not hesitate to contact us at the following contact point: environment@bridgestone.eu.

Yours faithfully,
Andrea Colussi

Director Environment, Health & Safety
Bridgestone EMIA
Validity of this statement : 1year.

Annex I – List of impacted tires
